V. 閱讀測驗：請依句意選出最適當的一個答案，每題 4 分 (20%)

In 1978, the first test tube baby was born in England. Since then, more than 45,000 American babies have been born as a result of this procedure. Many couples would not have been able to have children if they hadn't used this method. However, producing babies this way has brought up some legal and moral problems.

John and Luanne Buzzanca wanted to have a baby but couldn't. In 1994, they arranged to have a baby with an egg and sperm from anonymous donors implanted in a surrogate mother, Pamela Snell. Pamela agreed to turn the baby over to the Buzzancas. However, a month before the baby, Jaycee, was born, John filed for divorce. He said he didn't want to pay child support because he wasn't the biological father. Luanne took John to court for child support. Pamela took Luanne to court, wanting to keep the baby. Pamela said that if she had known that there were going to be so many difficulties, she wouldn't have agreed to have the baby for the Buzzancas. She said that Luanne couldn't give the baby a stable home. The judge decided that Luanne should raise the little girl and that John had to pay child support.

21. Which country created the first test tube baby in the world?  
 (A) USA (B) UK (C) USSR (D) SA
22. What kind of problem is created by the test tube baby in this article?  
 (A) Economic (B) Population (C) Pollution (D) Legal
23. What did Pamela did for the Buzzancas?  
 (A) She babysat their daughter. (B) She sued their daughter.  
 (C) She gave birth to their daughter. (D) She kept their daughter.
24. Who is the biological parent of Jaycee?  
 (A) John Buzzanca (B) Luanne Buzzanca (C) Pamela Snell (D) An anonymity
25. Who had Jaycee in the end?  
 (A) Luanne Buzzancas (B) John Buzzancas (C) Pamela Snell (D) The judge
